### INVESTMENT OBJECTIVE AND STRATEGY

The Fund is a Peso-denominated balanced Unit Investment Trust Fund that aims to achieve for its participants, growth and high income from a portfolio of diversified, blue-chip and fundamentally sound equities listed at the Philippine Stock Exchange (PSE) and peso-denominated fixed income securities. The Fund may invest between 40% and 60% of its market value in equities listed in Philippine Stock Exchange and a minimum of 40% of its market value in peso-denominated fixed income securities. The Fund's composite benchmark is composed of 60% Philippine Stock Exchange Index and 40% Markit iBoxx ALBI Philippines 1-5.

### CLIENT SUITABILITY

A client profiling process is performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are encouraged to update the resulting profile every three (3) years or if there's any change in his/her personal/financial circumstances. Before deciding to invest, clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, or seek an independent/professional opinion when necessary.

### The METRO BALANCED FUND is suitable only for investors who:

- Have an Aggressive profile.
- Want capital growth over the long-term and are willing to be exposed to a higher level of risk that may involve possible loss of principal in the short-term in exchange for higher long-term gains.
- Recommended investment horizon is at least five (5) years
- Participation in the Fund shall be open to Filipino individuals, resident and non-resident aliens and corporate accounts.

### KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

<b>Interest Rate Risk:</b>	The possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
<b>Market/Price Risk:</b>	The possibility for an investor to experience losses due to changes in the market prices of bonds and stocks/equities. It refers to the portfolio's exposure to marked-to-market valuation due to market price fluctuations of the bonds and stocks/equities.
<b>Liquidity Risk:</b>	The possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a price that could result in a loss. This may be caused by low trading volume due to different reasons such as securities with small or few outstanding issues, absence of buyers and/or sellers (limited buy/sell activity) or underdeveloped capital market.
<b>Credit Risk / Default Risk:</b>	The possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of fixed income security which the borrower issued. This inability of the borrower or counterparty to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security.
<b>Reinvestment Risk:</b>	The possibility of having lower returns or earnings when funds mature and are reinvested. Investors in the UITF who redeem and realize their gains run the risk of reinvesting their funds in an alternative investment outlet with lower yields. Similarly, the UIT fund manager is faced with the risk of not being able to find better yielding alternative investment outlets as some of the securities in the fund matures.
<b>Other Risks:</b>	Your participation in the UITFs may be further exposed to the risk of any actual or potential conflicts of interest in the handling of in-house or related party transactions by Metrobank. These transactions may include own-bank deposits; purchase of own-institution or affiliate obligations (stocks, mortgages); purchase of assets from or sales to own institution, directors, officers, subsidiaries, affiliates or other related interests/parties; or purchases or sales between fiduciary/managed accounts.

The Fund invests only in high-credit quality assets which are evaluated using a rigorous internal scoring model required under the Trustee's accreditation process and BSP regulations. Internal risk limits and position limits together with regulatory exposure limits are monitored, reviewed and strictly adhered to on a daily basis. The Fund may also use financial derivatives solely for hedging risk exposures.

**THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).**

**RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY.**

**WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.**

**THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.**

## INVESTMENT POLICY

The Fund may be invested and reinvested in the following instruments:

- Equities listed in the PSE
- Fixed Income Instruments and Securities
- Deposits
- Other investments allowed under BSP regulations

## OUTLOOK AND STRATEGY

Edging closer to the 7,000 immediate resistance, the local stock market managed to sustain the rally for another month; the PSEi gained +97pts or +1.4% MoM to end the quarter at 6,952 as the quarantine status is expected to ease further given the improvement of the Covid condition of the country. Foreign players were back as net sellers in September pushing the YTD tally to around \$1.7 Mn- also due to the FTSE rebalancing that occurred. The market's average daily turnover increased to about \$170 Mn from August's \$150 Mn brought by RCR's IPO. Driven by the hawkish statement of the Fed that led to the upward movement in US Treasury rates, yields in the local bond market steepened further- the short to intermediate part of the curve increased by 10-20bps while the longer-end rose as much as 30-50bps.

Slowdown in food and transportation prices pulled the CPI print for September to ease at 4.8%- better than the consensus estimate of 5.1%; 9-month average inflation remains steady at 4.5%. The PSE debuted its fourth listed REIT, RCR which rose by +6.7% this month. As guided by RCR, at the IPO price of P6.45, the 2022 forecasted dividend yield is about 5.7%. On the fixed income front, all five local bond auctions of the Bureau of Treasury (BTr) were successful with oversubscription reaching 2-3 times and the average awarded yields were higher by 20-40 bps from August's results.

As the Covid cases drop, renewed positive market sentiment may be expected and investors may opt to position ahead of 2022. For the local bond market, all eyes will be on the 5 to 7-year bond October borrowing schedule of the BTr with the offer size unchanged at P35 Bn.
