¹ As a percentage of average daily NAV for the month valued at (in Php Bns): **79.60**

INVESTMENT OBJECTIVE AND STRATEGY

The Fund is a Peso-denominated money market Unit Investment Trust Fund that aims to achieve for its participants, liquidity and income slightly higher than regular time deposit products by investing in a diversified portfolio of Peso-denominated money market instruments and fixed income securities with a maximum weighted average duration of one year. The Fund's composite benchmark is composed of 75% average rate of the most recent 91-day Philippine Treasury Bill auction, net of taxes and 25% Markit iBoxx ALBI Philippines Money Market.

CLIENT SUITABILITY

A client profiling process is performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are encouraged to update the resulting profile every three (3) years or if there's any change in his/her personal/financial circumstances. Before deciding to invest, clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, or seek an independent/professional opinion when necessary.

The METRO SHORT TERM FUND is suitable only for investors who:

- Have a Moderate profile.
- Want liquidity but are willing to take on minimal volatility in exchange for slightly better returns than regular time deposit products.
- Recommended investment horizon is at least six (6) months
- Participation in the Fund shall be open to Filipino individuals, resident and non-resident aliens and corporate accounts.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	The possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
Market/Price Risk:	The possibility for an investor to experience losses due to changes in the market prices of bonds. It refers to the portfolio's exposure to marked-to-market valuation due to market price fluctuations of the bonds.
Liquidity Risk:	The possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a price that could result in a loss. This may be caused by low trading volume due to different reasons such as securities with small or few outstanding issues, absence of buyers and/or sellers (limited buy/sell activity) or underdeveloped capital market.
Credit Risk / Default Risk:	The possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of fixed income security which the borrower issued. This inability of the borrower or counterparty to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security.
Reinvestment Risk:	The possibility of having lower returns or earnings when funds mature and are reinvested. Investors in the UITF who redeem and realize their gains run the risk of reinvesting their funds in an alternative investment outlet with lower yields. Similarly, the UIT fund manager is faced with the risk of not being able to find better yielding alternative investment outlets as some of the securities in the fund matures.
Other Risks:	Your participation in the UITFs may be further exposed to the risk of any actual or potential conflicts of interest in the handling of in-house or related party transactions by Metrobank. These transactions may include own-bank deposits; purchase of own-institution or affiliate obligations (stocks, mortgages); purchase of assets from or sales to own institution, directors, officers, subsidiaries, affiliates or other related interests/parties; or purchases or sales between fiduciary/managed accounts.

The Fund invests only in high-credit quality assets which are evaluated using a rigorous internal scoring model required under the Trustee's accreditation process and BSP regulations. Internal risk limits and position limits together with regulatory exposure limits are monitored, reviewed and strictly adhered to on a daily basis. The Fund may also use financial derivatives solely for hedging risk exposures.

THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).

RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY.

WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.

THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.

FUND PERFORMANCE AND STATISTICS as of May 31, 2022

(Purely for reference purposes and is not a guarantee of future results)

NAVPu GRAPH

NAVPu OVER THE PAST 12 MONTHS

Highest	1.119041
Lowest	1.110727

STATISTICS

Weighted Average Duration (in years)	0.45
Volatility, Past 1 Year (in %) ²	0.17%
Sharpe Ratio ³	-2.19
Information Ratio ⁴	-2.90

² Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. The lower the number, the more stable the Fund's return is relative to its average return over time. Starting December 2017, computation is based on the annualized standard deviation of monthly returns.

³ Sharpe Ratio is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better.

⁴ Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

CUMULATIVE PERFORMANCE

	1 Month	3 Months	6 Months	1 Year	3 Years	5 Years	Since Inception ⁵
Fund	0.010%	0.127%	0.335%	0.749%	5.037%	11.451%	11.904%
Benchmark	0.085%	0.258%	0.483%	0.978%	4.203%	7.600%	7.900%

⁵ The Bloomberg Philippine Sovereign Bond Index Money Market, Adjusted was tentatively discontinued when the GS pricing basis shifted from PDST-R2 of PDEX to BVAL of Bloomberg effective October 29, 2018. This was however replaced by the BPI Philippine Government Money Market Index starting November 2018 until present.

The Philippine Special Savings Rate General Average (net of taxes) has been discontinued effective 31 Dec 2019; The Fund used the last available value of PSAVAVE (from January 2020 to September 22, 2020) and the average rate of the most recent 91-day Philippine Treasury Bill auction, net of taxes (from September 23, 2020 until October 20, 2020).

The Fund changed its benchmark to 75% average rate of the most recent 91-day Philippine Treasury Bill auction, net of taxes and 25% Markit iBoxx ALBI Philippines Money Market on October 21, 2020.

Unit Investment Trust Funds

INVESTMENT POLICY

The Fund may be invested and reinvested in the following instruments:

- Deposits and special savings
- BSP deposit facilities
- Repurchase Agreements (Repos)
- Government Securities
- Corporate Bonds
- Other investments allowed under BSP regulations

OUTLOOK AND STRATEGY

For the first time since 2018, the Bangko Sentral ng Pilipinas (BSP) raised its policy rates by 25 bps to 2.25% to “help arrest further second-round effects and temper the buildup in inflation expectations”. May inflation was well-within consensus at 5.4% YoY vs. 4.9% YoY in April led by the acceleration in transport, and food and non-alcoholic beverage prices. BSP Governor Diokno cited a strong rebound in economic activity and jobs market in the first quarter would let the central bank unwind their monetary policy support. He further noted that the BSP’s legroom for policy accommodation is shrinking as inflation starts to fall within their target range. Meanwhile, incoming BSP Governor Felipe Medalla sees no rush in raising policy rates with inflation mainly driven by rising import costs.

With rising inflation and increasingly more hawkish central banks, investors demand higher premium. The Bureau of Treasury (BTR) was only able to partially meet their monthly funding requirements as average auction yields are higher by 20-30 bps. Similarly, 28-day BSP securities averaged higher in May by 30 bps hovering above the newly adjusted BSP policy rate at 2.25%. Issue sizes were higher at Php 130 – 150 bn compared to April’s Php 120 – 140 bn.

IMPORTANT NOTICE

Metropolitan Bank and Trust Company is regulated by the Bangko Sentral ng Pilipinas (BSP).
