<sup>1</sup> As a percentage of average daily NAV for the month valued at (in USD Mns): **388.91**

### INVESTMENT OBJECTIVE AND STRATEGY

The Fund intends to achieve for its participants income and liquidity by investing in a portfolio of US\$ denominated deposits and other money market instruments with a maximum weighted average duration of one year.

The Fund's benchmark is the Philippine Dollar Deposit Rates Savings Deposits (PPSDUS\$). The choice of benchmark is aligned with the general characteristic of the fund which is a short term investment facility.

### CLIENT SUITABILITY

A client profiling process is performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are encouraged to update the resulting profile every three (3) years or if there's any change in his/her personal/financial circumstances. Before deciding to invest, clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, or seek an independent/professional opinion when necessary.

### The METRO\$ MONEY MARKET FUND is suitable only for investors who:

- Have an Conservative profile.
- The Fund aims to outperform the Philippine Dollar Deposit Rates Savings Deposits (PPSDUS\$).
- Recommended investment horizon is at least 30 days
- Participation in the Fund shall be open to Filipino individuals, resident and non-resident aliens and corporate accounts.

### KEY RISKS AND RISK MANAGEMENT

**You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.**

<b>Liquidity Risk:</b>	The possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a price that could result in a loss. This may be caused by low trading volume due to different reasons such as securities with small or few outstanding issues, absence of buyers and/or sellers (limited buy/sell activity) or underdeveloped capital market.
<b>Credit Risk / Default Risk:</b>	The possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of fixed income security which the borrower issued. This inability of the borrower or counterparty to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security.
<b>Reinvestment Risk:</b>	The possibility of having lower returns or earnings when funds mature and are reinvested. Investors in the UITF who redeem and realize their gains run the risk of reinvesting their funds in an alternative investment outlet with lower yields. Similarly, the UIT fund manager is faced with the risk of not being able to find better yielding alternative investment outlets as some of the securities in the fund matures.
<b>Foreign Exchange Risk:</b>	The possibility for an investor to experience losses due to fluctuations in foreign exchange rates. The exchange rates depend upon a variety of global and local factors, e.g. interest rates, economic performance, and political developments.
<b>Country Risk:</b>	The possibility for an investor to experience losses arising from investments in securities issued by/in foreign countries due to the political, economic and social structures of these countries. There are risks in foreign investments due to the possible internal and external conflicts, currency devaluations, foreign ownership limitations and tax increases of the foreign country involved which are difficult to predict but must be taken into account in making such investments.
<b>Other Risks:</b>	Your participation in the UITFs may be further exposed to the risk of any actual or potential conflicts of interest in the handling of in-house or related party transactions by Metrobank. These transactions may include own-bank deposits; purchase of own-institution or affiliate obligations (stocks, mortgages); purchase of assets from or sales to own institution, directors, officers, subsidiaries, affiliates or other related interests/parties; or purchases or sales between fiduciary/managed accounts.

The Fund invests only in high-credit quality assets which are evaluated using a rigorous internal scoring model required under the Trustee's accreditation process and BSP regulations. Internal risk limits and position limits together with regulatory exposure limits are monitored, reviewed and strictly adhered to on a daily basis. The Fund may also use financial derivatives solely for hedging risk exposures.

**THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).**

**RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY.**

**WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.**

**THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.**

## FUND PERFORMANCE AND STATISTICS as of May 31, 2022

(Purely for reference purposes and is not a guarantee of future results)

### NAVPu GRAPH

### NAVPu OVER THE PAST 12 MONTHS

Highest	1.033075
Lowest	1.030758

### STATISTICS

Weighted Average Duration (in years)	0.35
Volatility, Past 1 Year (in %)²	0.02%
Sharpe Ratio³	8.21
Information Ratio⁴	7.70

² Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. The lower the number, the more stable the Fund's return is relative to its average return over time. Starting December 2017, computation is based on the annualized standard deviation of monthly returns.

³ Sharpe Ratio is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better.

⁴ Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

### CUMULATIVE PERFORMANCE

	1 Month	3 Months	6 Months	1 Year	3 Years	5 Years	Since Inception <sup>5</sup>
<b>Fund</b>	0.035%	0.076%	0.124%	0.225%	1.675%	N/A	3.308%
<b>Benchmark</b>	0.005%	0.016%	0.035%	0.078%	0.471%	N/A	0.688%

### PORTFOLIO COMPOSITION

Allocation	% of Fund
Time Deposits	97.71%
Cash	2.29%
Other Receivables - Net of Liabilities <sup>6</sup>	0.00%

<sup>6</sup> Includes accrued income from investments, receivables from brokers/counterparties and unpaid expenses.

### TOP 10 HOLDINGS

Name	Maturity	% of Fund
1. \$GENSSA ROB	06.06.22	13.98%
2. \$GENTD CHINABAN	07.11.22	13.93%
3. \$GENTD RCBC	07.13.22	13.86%

# Unit Investment Trust Funds

## INVESTMENT POLICY

The Fund may be invested and reinvested in the following instruments:

- US Dollar-denominated deposits with local banks/branches of foreign banks operating in the Philippines;
- US Dollar-denominated money market instruments;
- Government Securities
- Other Investments allowed under regulations issued by the Bangko Sentral Ng Pilipinas.

## OUTLOOK AND STRATEGY

With inflation at 8.3% YoY being uncomfortably high, global central banks barely have any elbowroom in their policy toolkit. Central banks have increasingly turned hawkish as they attempt to engineer a soft-landing against an impending stagflation – a lethal combination of slow growth and high prices. While this is still quite far off, market in the meantime is wary of the Fed's next move following its 50-bp hike recently. Additionally, Fed officials have outlined the monthly tapering of their balance sheet by \$95 billion (\$60 billion in US Treasuries and \$35 billion in mortgage-backed securities) to start in June. Meanwhile, in a majority vote, the Bank of England raised its policy rates by 25 bps to 1% whereas the minority voted for a 50 bps increase to 1.25%. The move was driven by expectations of a possible double-digit inflation as rising oil prices continued to put pressure.

Beating economists' expectations, US Inflation remains elevated at 8.3% year-on-year in April vs. 8.1% consensus and 8.50% in March. Shelter costs, accounting for a third in CPI, rose the fastest since 1991. In its second reading, 1Q US GDP shrank at an annual rate of 1.50% worse than previous month's print of 1.40%. The print was primarily due to decreased government assistance and slower business activities while an uptick in consumer spending barely offset them.

US Treasury yields fell 9-16 bps with the exception of the 30Y bond rising 5 bps closing at 3.05%. As volatility intensified and market breadth deteriorating, investors sought safety in US government bonds with the 10Y benchmark at 2.84% (-9 bps MoM). 12-month US benchmark rates just closed flat for the month closing at 2.05%. In response to Fed rate hike, short-term time deposits repriced higher of roughly the same magnitude.

## IMPORTANT NOTICE

Metropolitan Bank and Trust Company is regulated by the Bangko Sentral ng Pilipinas (BSP).
