INVESTMENT OBJECTIVE AND STRATEGY

The Fund is a Peso-denominated money market Unit Investment Trust Fund that aims to achieve for its participants liquidity and income that is higher than that of regular time deposit products by investing in a diversified mix of peso-denominated deposits with a maximum weighted average fund duration of one year.

The Fund's benchmark is the average rate of the most recent 91-day Philippine Treasury Bill auction, net of taxes. The choice of benchmark is aligned with the general characteristic of the fund which is a short term investment facility.

CLIENT SUITABILITY

A client profiling process is performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are encouraged to update the resulting profile every three (3) years or if there's any change in his/her personal/financial circumstances. Before deciding to invest, clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, or seek an independent/professional opinion when necessary.

The METRO MONEY MARKET FUND is suitable only for investors who:

- Have a Conservative profile.
- Want relatively higher return than regular deposit products.
- Recommended investment horizon is at least one (1) month.
- Participation in the Fund shall be open to all Philippine residents, including resident aliens and Filipino citizens residing therein, and domestic corporations.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Liquidity Risk: The possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a price that could result in a loss. This may be caused by low trading volume due to different reasons such as securities with small or few outstanding issues, absence of buyers and/or sellers (limited buy/sell activity) or underdeveloped capital market.

Credit Risk / Default Risk: The possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of fixed income security which the borrower issued. This inability of the borrower or counterparty to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security.

Reinvestment Risk: The possibility of having lower returns or earnings when funds mature and are reinvested. Investors in the UITF who redeem and realize their gains run the risk of reinvesting their funds in an alternative investment outlet with lower yields. Similarly, the UIT fund manager is faced with the risk of not being able to find better yielding alternative investment outlets as some of the securities in the fund matures.

Other Risks: Your participation in the UITFs may be further exposed to the risk of any actual or potential conflicts of interest in the handling of in-house or related party transactions by Metrobank. These transactions may include own-bank deposits; purchase of own-institution or affiliate obligations (stocks, mortgages); purchase of assets from or sales to own institution, directors, officers, subsidiaries, affiliates or other related interests/parties; or purchases or sales between fiduciary/managed accounts.

The Fund invests only in high-credit quality assets which are evaluated using a rigorous internal scoring model required under the Trustee's accreditation process and BSP regulations. Internal risk limits and position limits together with regulatory exposure limits are monitored, reviewed and strictly adhered to on a daily basis. The Fund may also use financial derivatives solely for hedging risk exposures.

THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).

RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY.

WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.

THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.

STATISTICS

Weighted Average Duration (in years)	0.11
Volatility, Past 1 Year (in %) ²	0.32%
Sharpe Ratio ³	-0.28
Information Ratio ⁴	-16.88

² Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. The lower the number, the more stable the Fund's return is relative to its average return over time. Starting December 2017, computation is based on the annualized standard deviation of monthly returns.

³ Sharpe Ratio is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better.

⁴ Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

INVESTMENT POLICY

The Fund may be invested and reinvested in the following instruments:

- Deposits
- BSP deposit facilities
- Government Securities
- Other investments that take the nature of deposits allowed under BSP regulations

OUTLOOK AND STRATEGY

Many believe that 7 and 8 are lucky numbers. Not so for the market it seems. Seven was the number of rate hikes by the Fed which brought their policy rate to 4.50%, with a promise of more to come this year. The BSP, for its part hiked rates seven times as well to 5.50%, bringing the so called interest rate differential 100 basis points (1.00%), one of its narrowest. The BSP too, signaled further hikes in 2023, pushing the rate to 6% by end-2023. The number eight meanwhile, hounded the market as inflation hit that mark in Nov (8.1%) and Dec (8.0%) pushed by higher food and energy prices as the reopening and the Christmas celebrations were in full swing.

The Bureau of Treasury only had one T-Bill and two bond auctions for the month raising a total of PhP65.069Bn as most players were already on holiday mode. For T-bills, the BTR raised only P7.10Bn or just 47% out of the total P15Bn issue size for that one TBL auction in December. 91days were awarded lower by 12bps MoM at an average of 4.089%, while the 182days were awarded higher by just 3Bps MoM now at 4.95% average. The 1y paper was fully rejected by the BTr. Better awards were seen in the Bond auctions, with PhP 57.969Bn awarded or 83% out of PhP70B offered size for the two Bond auctions. The BSP meanwhile awarded the BSP Bills at an average of 44bps higher compared to the average during the last BSP Bill auction in November : from 6.00% average in November 25, now at 6.44% average in December 23.
