INVESTMENT OBJECTIVE AND STRATEGY

The Fund is a Peso-denominated medium term bond Unit Investment Trust Fund that aims to achieve for its participants, income generation and capital appreciation by investing in a diversified portfolio of predominantly peso-denominated corporate fixed income securities with a maximum weighted average duration of five years. The Fund's composite benchmark is composed of 80% BPI Philippine Corporate Bond Index and 20% average rate of the most recent 91-day Philippine Treasury Bill auction, net of taxes.

CLIENT SUITABILITY

A client profiling process is performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are encouraged to update the resulting profile every three (3) years or if there's any change in his/her personal/financial circumstances. Before deciding to invest, clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, or seek an independent/professional opinion when necessary.

The METRO CORPORATE BOND FUND is suitable only for investors who:

- Have a Moderate profile.
- Want income generation and capital appreciation over the medium-term.
- Recommended investment horizon is at least five (5) years
- Participation in the Fund shall be open to Filipino individuals, resident and non-resident aliens and corporate accounts.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

| | |
|------------------------------------|--|
| Interest Rate Risk: | The possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates. |
| Market/Price Risk: | The possibility for an investor to experience losses due to changes in the market prices of bonds. It refers to the portfolio's exposure to marked-to-market valuation due to market price fluctuations of the bonds. |
| Liquidity Risk: | The possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a price that could result in a loss. This may be caused by low trading volume due to different reasons such as securities with small or few outstanding issues, absence of buyers and/or sellers (limited buy/sell activity) or underdeveloped capital market. |
| Credit Risk / Default Risk: | The possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of fixed income security which the borrower issued. This inability of the borrower or counterparty to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security. |
| Reinvestment Risk: | The possibility of having lower returns or earnings when funds mature and are reinvested. Investors in the UITF who redeem and realize their gains run the risk of reinvesting their funds in an alternative investment outlet with lower yields. Similarly, the UIT fund manager is faced with the risk of not being able to find better yielding alternative investment outlets as some of the securities in the fund matures. |
| Other Risks: | Your participation in the UITFs may be further exposed to the risk of any actual or potential conflicts of interest in the handling of in-house or related party transactions by Metrobank. These transactions may include own-bank deposits; purchase of own-institution or affiliate obligations (stocks, mortgages); purchase of assets from or sales to own institution, directors, officers, subsidiaries, affiliates or other related interests/parties; or purchases or sales between fiduciary/managed accounts. |

The Fund invests only in high-credit quality assets which are evaluated using a rigorous internal scoring model required under the Trustee's accreditation process and BSP regulations. Internal risk limits and position limits together with regulatory exposure limits are monitored, reviewed and strictly adhered to on a daily basis. The Fund may also use financial derivatives solely for hedging risk exposures.

THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).

RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY.

WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.

THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.

INVESTMENT POLICY

The Fund may be invested and reinvested in the following instruments:

- Deposits
- BSP deposit facilities
- Repurchase Agreements (Repos)
- Government Securities
- Corporate Bonds
- Other investments allowed under BSP regulations

OUTLOOK AND STRATEGY

Many believe that 7 and 8 are lucky numbers. Not so for the market it seems. Seven was the number of rate hikes by the Fed which brought their policy rate to 4.50%, with a promise of more to come this year. The BSP, for its part hiked rates seven times as well to 5.50%, bringing the so called interest rate differential 100 basis points (1.00%), one of its narrowest. The BSP too, signaled further hikes in 2023, pushing the rate to 6% by end-2023. The number eight meanwhile, hounded the market as inflation hit that mark in Nov (8.1%) and Dec (8.0%) pushed by higher food and energy prices as the reopening and the Christmas celebrations were in full swing.

Since the December BSP 50bps hike by both the BSP and the FED were widely expected already, GS yields were down by an average of 16bps led by the belly to the long-end of the curve as market players position their portfolios already for next year. The 7y and 10y BVAL were both down 21bps MoM, while the 20y BVAL was down 35bps MoM.

The Bureau of Treasury only had one T-Bill and two bond auctions for the month raising a total of PhP65.069Bn as most players were already on holiday mode. The averages for the 5y and 12y auctions this month were lower by 56bps and 98bps respectively versus the awarded averages in November. The BTr will offer PhP200Bn total worth of TBLs and bonds in January, higher than the PhP135Bn target size last month. The BTR's January bond borrowing program will cover 7Y, 13Y, 20Y, and 10Y bonds, with whispers of a potential jumbo RTB issuance in the 1st quarter of 2023.
