INVESTMENT OBJECTIVE AND STRATEGY

The Fund is a Peso-denominated equity Unit Investment Trust Fund that aims to achieve for its participants, maximum growth from a portfolio of diversified, blue-chip and fundamentally sound equities listed at the Philippine Stock Exchange (PSE). The Fund may invest up to a maximum 100% or a minimum 40% of its market value in equities. The Fund's benchmark is the Philippine Stock Exchange Index .

CLIENT SUITABILITY

A client profiling process is performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are encouraged to update the resulting profile every three (3) years or if there's any change in his/her personal/financial circumstances. Before deciding to invest, clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, or seek an independent/professional opinion when necessary.

The METRO EQUITY FUND is suitable only for investors who:

- Have an Aggressive profile.
- Want capital growth over the long-term and are willing to be exposed to a higher level of risk that may involve possible loss of principal in the short-term in exchange for higher long-term gains.
- Recommended investment horizon is at least five (5) years
- Participation in the Fund shall be open to Filipino individuals, resident and non-resident aliens and corporate accounts.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Market/Price Risk:	The possibility for an investor to experience losses due to changes in the market prices of stocks/equities. It refers to the portfolio's exposure to marked-to-market valuation due to market price fluctuations of the stocks/equities.
Liquidity Risk:	The possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a price that could result in a loss. This may be caused by low trading volume due to different reasons such as securities with small or few outstanding issues, absence of buyers and/or sellers (limited buy/sell activity) or underdeveloped capital market.
Credit Risk / Default Risk:	The possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of fixed income security which the borrower issued. This inability of the borrower or counterparty to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security.
Reinvestment Risk:	The possibility of having lower returns or earnings when funds mature and are reinvested. Investors in the UITF who redeem and realize their gains run the risk of reinvesting their funds in an alternative investment outlet with lower yields. Similarly, the UIT fund manager is faced with the risk of not being able to find better yielding alternative investment outlets as some of the securities in the fund matures.
Other Risks:	Your participation in the UITFs may be further exposed to the risk of any actual or potential conflicts of interest in the handling of in-house or related party transactions by Metrobank. These transactions may include own-bank deposits; purchase of own-institution or affiliate obligations (stocks, mortgages); purchase of assets from or sales to own institution, directors, officers, subsidiaries, affiliates or other related interests/parties; or purchases or sales between fiduciary/managed accounts.

The Fund invests only in high-credit quality assets which are evaluated using a rigorous internal scoring model required under the Trustee's accreditation process and BSP regulations. Internal risk limits and position limits together with regulatory exposure limits are monitored, reviewed and strictly adhered to on a daily basis. The Fund may also use financial derivatives solely for hedging risk exposures.

THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC). RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY. WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.

THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.

INVESTMENT POLICY

The Fund may be invested and reinvested in the following instruments:

- Equities listed in the PSE
- Deposits
- Other investments allowed under BSP regulations

OUTLOOK AND STRATEGY

October proved to be one of the worst months this year for domestic equities as shares plunged -5.5% MoM, breaching the 6000 psychological support, sparing no one as all sectoral indices ended in the red. Much of the move can be attributed to macroeconomic challenges related to policy rates, inflation, and geopolitical tensions. That said, market participants were mostly sidelined with average daily turnover ending at \$80.1mn, significantly lower than the 10-year average of \$145.7mn, while foreign funds continued to be net sellers in the amount of \$171mn. Notably, foreign selling was concentrated on Banks and FBT (food, beverage, tobacco), particularly URC (-8.1% MoM) and JFC (-10.6% MoM).

Inflation in the Philippines for September came in much higher than expected at 6.1%, surpassing the consensus estimate of 5.3%. The primary driver of this surge in inflation was rising food prices, particularly due to issues with the rice supply in the country. As a result of this inflationary pressure, speculations about an off-cycle interest rate hike by the BSP increased. Indeed, the central bank announced a 25bp hike after the markets closed on October 27. This hike brought the cumulative increase in policy rates to 450bps since May 2022, placing the policy rate at 6.5%. Furthermore, the BSP revised its 2024 inflation forecast to 4.7% from 4.3%.

Meanwhile, 3Q23/9M23 corporate earnings season also kicked off during the month, with 8 index names already reporting their results. Banks continued to expand their NIMs, although they experienced slower loan growth. BDO (-10.2% MoM) and MBT (-3.6% MoM) met expectations, while BPI (-10.3% MoM) exceeded expectations due to lower provisioning. Retail companies showed mixed results; PGOLD (-6.2% MoM) was in line on steady SSSG for Puregold stores while WLCON's (-10.0% MoM) SSSG declined on softer demand and margin contraction. AEV (-8.7% MoM) was mostly in line with all their subsidiaries reporting stronger earnings, with the exception of UBP (+0.70% MoM). Lastly, DMC (-5.4% MoM) and subsidiary SCC (-19.9% MoM) disappointed on coal and nickel prices contracting.

Given the uncertainties in the equity markets, maintaining a cautious stance is advisable. Various threats, both local and global, including persistent higher interest rates and elevated inflation, may continue to keep investors cautious. However, the PSEI is potentially looking to establish a strong support level amidst these uncertainties. The current market valuation appears attractive, and selective bottom-fishing, particularly for stocks that have experienced significant declines and have valuations significantly deviating from their historical averages, may be warranted.
